

# GAS RELAY CONTROL PANEL

- ASCO Relay Control Panels are designed to control gas flow to school kitchens and science rooms, domestic cooking classes, ceramic and metal shops.
- Vandalism and malicious mischief have caused some city governments to make it mandatory that the gas supply be locked off during closed hours.
- Features a key-operated switch with manual “off” button and “on” light.
- Used with ASCO Gas Solenoid Valves. Mushroom “off” buttons also available.
- AC version Part # 108D90C shown below.
